

Ireland's Space Industry at a glance

A 40-year track record in supporting strong semiconductors and communications sectors has created a platform for the next generation of digital industry, including Space industries.

- **109 companies in Ireland** are active in the European Space Agency (ESA)
- **Leading multinationals** serve the Space Sector from Ireland
- Ireland hosts the **8th ESA ScyLight Conference** in June 2025

Ireland's established Space Sector is supported by activities in advanced materials, systems integration, networking and communications, semiconductors, software development, AI, cybersecurity, aerospace and future mobility, research and innovation, commercial services, and supply chain management.

5 reasons why Ireland is a strong location for the Space Sector

Quality and availability of talent

Strong, diverse digital industry

Leading advanced manufacturing clusters

High impact research and innovation

Ease of doing business

Multi-national industry leaders choose Ireland

Ireland's vibrant and fast-growing Space industry is underpinned by strong **technology and engineering sectors**
